

Active Metabolic Testing

LOGO HERE
TAG LINE OR SLOGAN HERE

The team at [company name here] are very pleased to now be able to offer you leading edge portable VO2 testing for your personalized fitness journey!

Why would I do this type of testing?

VO2 active and resting tests provide invaluable specific insights into your cardiovascular **fitness** and **longevity** – and we can help you use those numbers by creating a training program **specific for your goals** whether you're just starting out, a long-term fitness enthusiast or a competitive athlete.

Active VO2 testing is **leading edge** in the development of **personalized training plans**. By knowing your aerobic capacity through the test results, we can tailor workouts so you can **reach your personal health goals**.

VO2 testing can also be used to **monitor** your **progress** over time. By conducting regular tests, we can track your improvements and **adjust your training** regimen to **reach your goals** long-term.

Overall, VO2 testing plays a vital role in making **informed training decisions**, monitoring progress, and **optimizing outcomes**.

- Maximal Metrics (VO2Max, HRmax)
- Ventilatory Thresholds (VT1, VT2)
- Training Zones
- Breathing Metrics
